Professional Summary

Full Stack Python Developer with hands-on experience delivering internal business and ERP applications. Strong focus on backend development, API integration, and database-driven systems, along with frontend implementation using React. Experienced in building scalable workflows for attendance, inventory, billing, and employee management while ensuring secure and maintainable application design.

Technical Skills

Backend Technologies: Python, Flask, REST API Development, SQLAlchemy, Authentication & Authorization

Frontend Technologies: React.js (Hooks), JavaScript (ES6), HTML5, CSS3, Bootstrap

Database Systems: MySQL, Relational Data Modeling, Query Optimization

Tools & Platforms: Git, GitHub, Postman, VS Code, Shopify

Core Concepts: CRUD Operations, Role-Based Access Control, Business Logic Implementation, Error Handling

Professional Experience

Full Stack Python Developer – V4 Sure IT Solutions, Chennai

Feb 2025 – Present

- Developed and supported internal ERP and office management solutions used for daily organizational operations.
- Implemented backend services responsible for secure user authentication, access control, and data processing.
- Created functional modules covering attendance tracking, employee records, user administration, inventory management, quotations, invoices, and location-based reporting.
- Established business workflows to handle quotation approval cycles, invoice generation, and status transitions.
- Collaborated with frontend teams to connect React interfaces with backend APIs and maintain consistent data exchange.

Projects

ERP & Office Management System (Lakhotia / SDS / Office Projects)

- Built a centralized management system to automate attendance, inventory, billing, and employee-related processes.
- Exposed RESTful endpoints supporting multiple modules with role-based permissions and secure access.
- Applied pagination and filtering mechanisms to handle large datasets efficiently.
- Optimized MySQL schemas to improve data integrity and application scalability.

E-commerce Platform (Shopify)

- Configured an e-commerce storefront for online product sales using Shopify.
- Managed product listings, pricing rules, collections, order workflows, and payment gateway setup.
- Ensured responsive layout and implemented basic SEO configurations to enhance visibility.

Education

B.Tech – Information Technology

Hindusthan Institute of Technology, Coimbatore

CGPA: 8.8 / 10
